Hi Laura,

I spoke with DSS and they are saying that both the vitamins and the prescription are considered "medical" and therefore not A2A allowable expenses. Therefore, they will need to be removed from the QER. That being said, everything else looks good, so once I get a revised QER, you should be good to go!

Thanks,

It was for prenatal vitamins for several different residents). One was an RX that was not covered under Medicaid (client was still waiting for application to be approved). I can remove the field if those are not allowed. Just let me know how to proceed.

Thank you,

Laura

Hi Laura,

It appears on the QER that you have used A2A funding for prescription assistance. If these are medical

prescriptions, this is not something A2A funding can be used for as it would fall under Medicaid. Can you please provide more information on this?

Thanks,

**Emily Kraft**
